

MHA50 portable decoding amplifier

- Listen to your music with McIntosh sound quality no matter where you go. Your headphones will thank you.
- The handheld MHA50 Portable Decoding Amplifier can make your music sound its best – and likely better than you’ve ever heard it before – through your headphones.
- Includes wired inputs for Apple® iOS and Android OTG¹ devices plus Mac® and Windows® computers; it can also wirelessly connect to these devices via Bluetooth® with aptX™ technology that ensures you receive the highest possible sound quality from your source device.
- Supports 32-bit/192kHz hi-res audio, DSD64, DSD128, DXD352.8, DXD384 files and asynchronous USB audio via its high-performance 32-bit digital-to-analog converter (DAC).
- Touch sensitive volume control knob inspired by the classic knobs found on countless McIntosh products.
- Headphone Crossfeed Director (HXD®) brings added dimension to your music in a natural sounding way.
- Drives headphones with impedances ranging from 8-600 ohms.
- Up to 6 hours of playback on a single charge (when connected to source device via Bluetooth); playback can last even longer when using the wired connections.

1) Devices must be compatible with USB On-The-Go technology in order to use a wired connection to the MHA50.

McIntosh Sound Quality No Matter Where You Go
